

PR.5. Identify summarizability potential problems in your star schema and indicate preferred resolutions of the summarizability problems. For incomplete dimension-fact relationships, you should also indicate if columns in a dimension table allow null values.

Solution:

- Member Table is missing values for Member Type
- Membership - Only for non-corporate customers and allow null value
- Event Details - Only apply to Special Events
- SaleItem - Add record for item name "Special Event"
- CustEmail - Allow null values
- Customer Location - Zip code allows null
